

# Veertoestellen

Veertoestellen zijn onontbeerlijke installaties in de meeste speeltuinen die bestemd zijn voor kleine kinderen. Zij bevorderen de ontwikkeling van het evenwicht en de coördinatie van de bewegingen van de allerkleinsten en zorgen bij grotere kinderen voor plezier om op een gekke manier te schommelen.

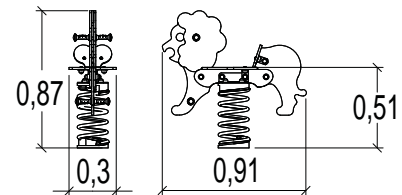

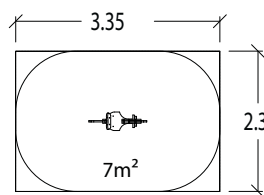

Het ergonomische ontwerp (aangepaste afmetingen, voetsteun, handgrepen) zorgt voor comfort en veiligheid van de gebruikers, terwijl tegelijkertijd de vormgeving, geïnspireerd op bekende silhouetten, de fantasie stimuleert.

# Draaitoestellen

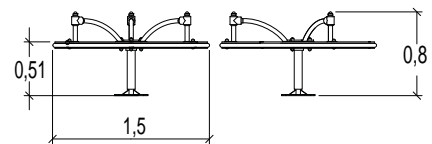

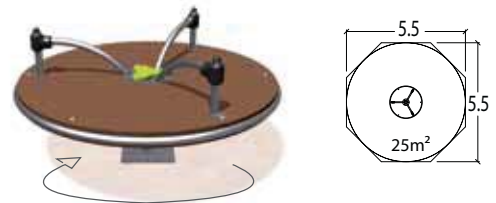

De grote favoriet bij jong en oud, roterende installaties zijn een vanzelfsprekendheid op iedere speelplek. De jongste kinderen kunnen zachtjes het genot ontdekken van beweging en snelheid op de draaitoestellen, terwijl oudere kinderen hun evenwicht en hun limieten kunnen testen met vernieuwende structuren die een combinatie bieden van roterende en schommelende bewegingen.

# Kabelbanen

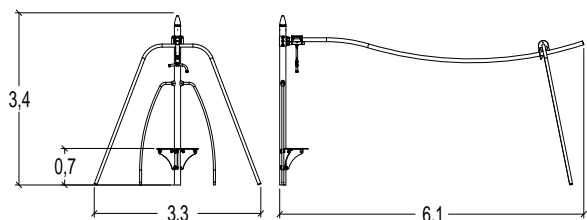

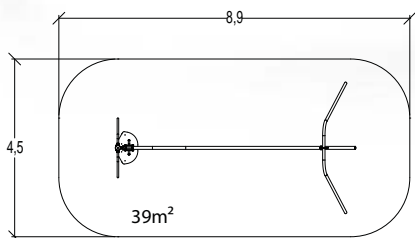

Bewegende installaties bieden sensaties die essentieel zijn in de creatie van een actieve ontspanningszone voor pre-tieners en adolescenten.

Jongeren kunnen zowel zichzelf als anderen uitdagen. De installaties bieden hen de mogelijkheid hun techniek te ontwikkelen en hun lichaamsbewegingen te controleren.

# Speelhuisjes

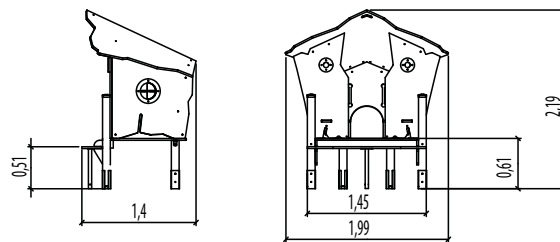

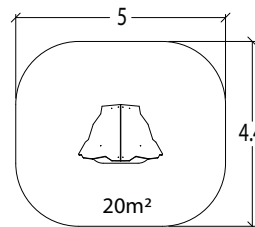

De kleine huisjes zijn op zichzelf al een fantastische speel- of ontmoetingsruimte voor kleine kinderen. De vormen, de meubels en de verzorgde afwerking, nodigen de kinderen uit om te ontsnappen in een fantasiewereld waarbij ze winkeltje, schooltje of keukentje spelen.

# Schommels

De schommel is natuurlijk het topelement, dat al vele generaties kinderen het gevoel gaf dat ze konden vliegen en een stukje hemel aanraken!

En hoewel er niets veranderd is aan het schommelplezier, bestaat er een grote verandering in de manieren om deze installatie te gebruiken: liggend dankzij de gondel, in een groep door middel van een zeshoekig frame, en in alle veiligheid voor de allerkleinsten, dankzij de zitplaats met tuigje en zijbeschermingen.

# Glijbanen

De glijbaan is tijdloos en maakt volledig deel uit van de belevingswereld van de kinderen.

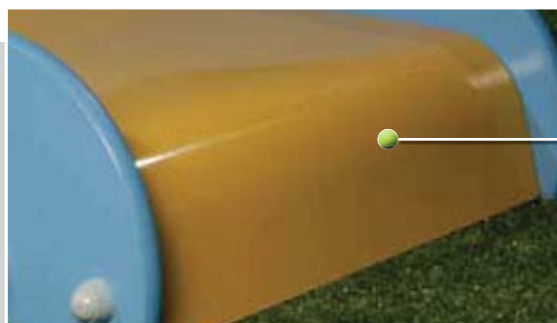

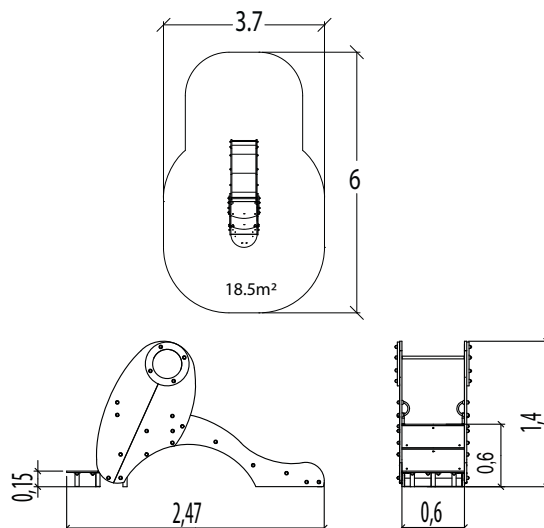

Voor de allerkleinsten garanderen de brede treden een stabiele basis voor een veilige toegang, terwijl de grotere kinderen in de ladder klimmen.

Rechte of golfvormige glijgoten, buisstructuren van roestvrij staal, Kayak-glijgoten van polyethyleen; de variaties in vormen, lengten en materialen bieden vele mogelijkheden bij de inrichting van een speeltuin en maken het mogelijk deze aan elke omgeving aan te passen.

# Mini-parcoursen

De mini-parcoursen zorgen voor een veilige speelomgeving voor jonge kinderen. Zij ontwikkelen en testen de evenwicht vaardigheden. De afzonderlijke speelelementen verschillen in omvang en in moeilijkheidsniveau. Zodra de basisvaardigheden zijn ontwikkeld kunnen kinderen de eigen verbeelding gebruiken. Fantaserend kunnen zij diverse balanceer uitdagingen aan gaan.

# Klimstructuren

De klimstructuren testen de persoonlijke balans, behendigheid en coördinatie van de bewegingen. De toesteldiversiteit is breed: netten, klimmuren, ladders, balken en piramide structuren bieden uiteenlopende mogelijkheden. Daarbij verschillen zij in moeilijkheidsniveau en zijn zij toepasbaar voor verschillende leeftijdsgroepen.

# De Verticale Wereld

De Verticale Wereld is ontworpen naar het principe van het «Parkour» dat bestaat uit het gebruik van obstakels uit het stadsmilieu, om te klimmen, te springen en allerlei soorten acrobatenkunsten uit te voeren.

Door de combinatie van tal van plaatsingsrichtingen (horizontaal, verticaal of hellend), maken de klimstructuren van de Verticale Wereld het mogelijk om op een technische en ludieke manier te bewegen.

De grote openingen stellen de gebruikers in staat om van de ene kant naar de andere kant te gaan. Hierbij zijn lenigheid en kracht vereist, maar tegelijkertijd openen ze kansen om weer een andere module te bereiken.

De verbindingselementen zoals netten, klimbuizen of loopbruggen vergroten het parcours, nivelleren de hoogten en vermenigvuldigen de obstakels die genomen moeten worden, wat de attractiviteit en de speelsheid van de activiteit versterkt.

De Verticale Wereld is gemaakt van kleine bekledingselementen die uitgevoerd zijn in het thema dat van toepassing is: Metropolis, Middeleeuwen of Amazone.

# De Hangwereld

Stelt u zich een klimtuin voor, een nieuwe manier van spelen of van omgaan met ruimte en hoogte. Dit is het ontwerp van een driedimensionale belevingswereld met, ludieke atypische en originele elementen. Dit is de creatie van een wereld waarin de gebruiker nooit de grond raakt en zich overgeeft aan evenwicht en zelfbeheersing.

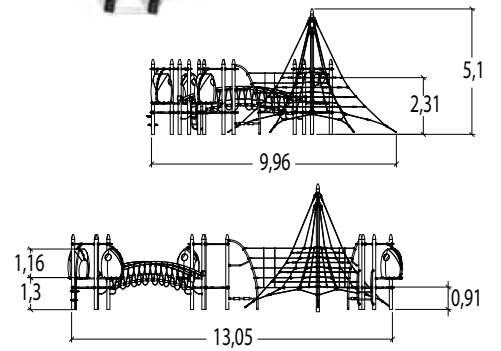

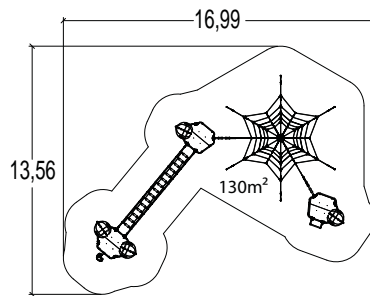

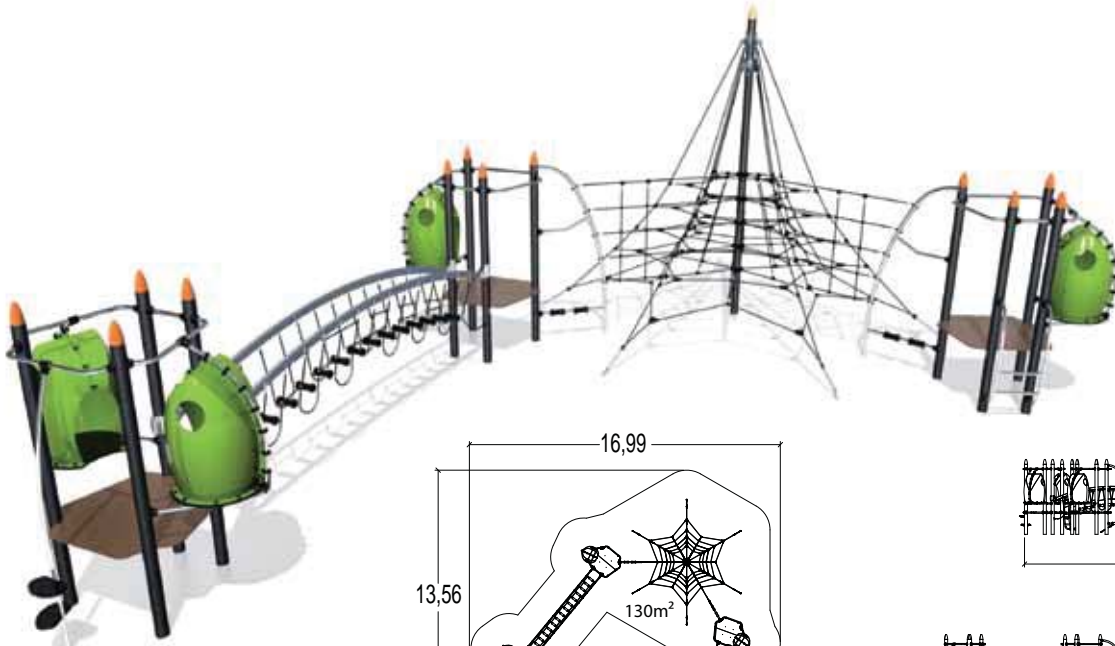

Het begrip "hangend" kan dus zowel worden toegepast op de spelelementen als op de gebruiker zelf en zijn manier om zich in het spel te bewegen.

Op een speelse, acrobatische manier doorloopt het kind een luchtparcours, dat bestaat uit diverse structuren die verbonden zijn met de piramide, het centrale element van de klimtuin. Neem bijvoorbeeld de boog die overbrugd wordt op basis van kracht in de armen, of de loopbrug die zowel soepel als instabiel is. En dan zijn er nog de 4 meter lange railbaan en het nest, dat is gevestigd in het midden van deze elementen en een ideale schuilplaats vormt om even op adem te komen.

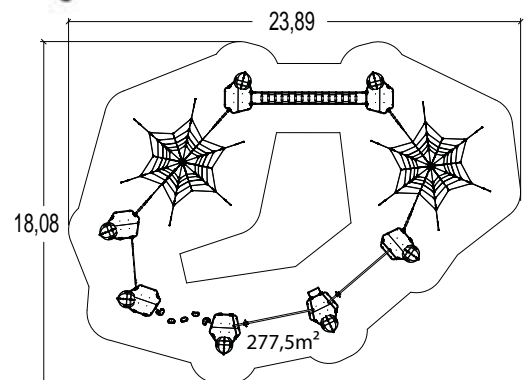

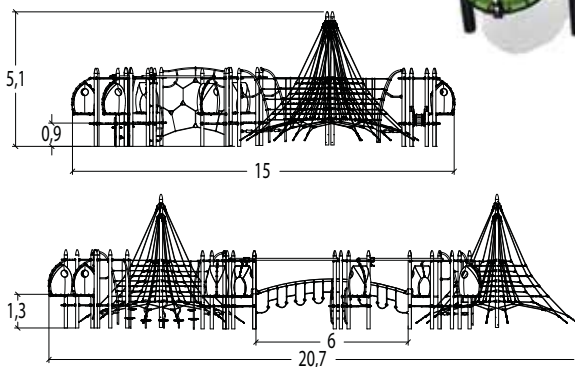

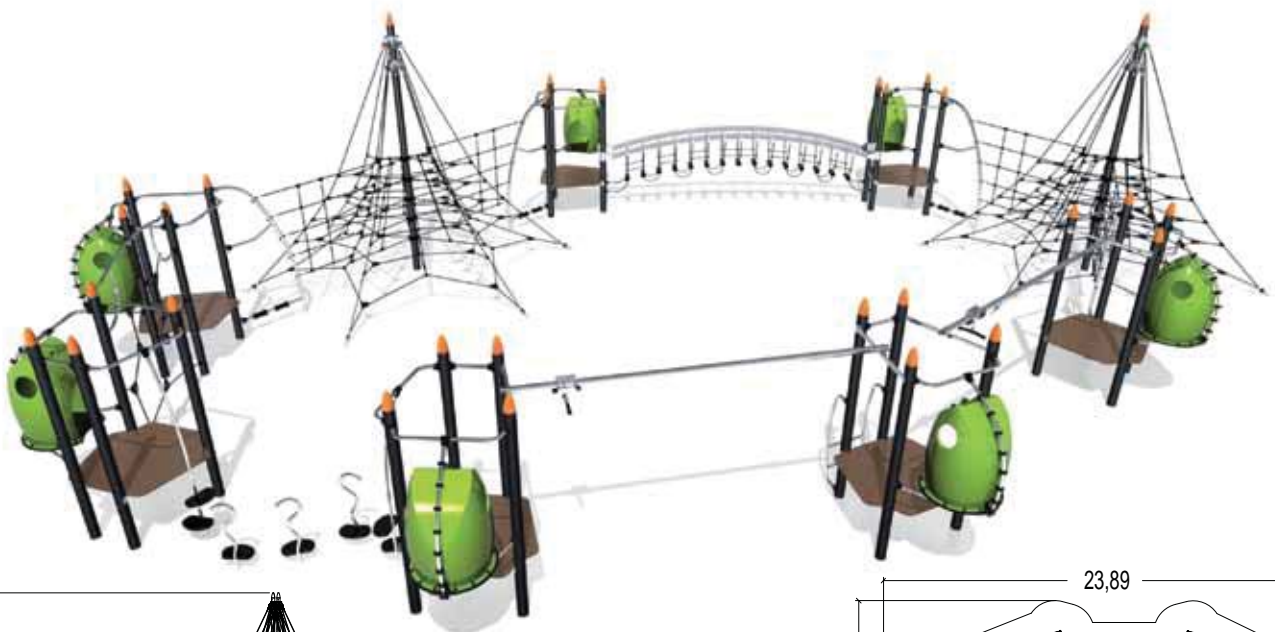

**J4800** 6+ 35 2,50 m | 1 = 17,00 m 2 = 10,30 m 3 = 5,00 m

**J4801** 6+ 60 3,00 m | 1 = 20,80 m 2 = 15,00 m 3 = 5,00 m

**J4801A** O.A.

J4802

6 +

80

3,00 m

1 = 29,00 m 2 = 19,00 m 3 = 5,00 m

J4802A
